

MANIKANDAN KUMARESAN

Advanced Back-End Software Engineer

Chennai, India | +91 89733 43353 | manikandan24may@gmail.com | <https://linkedin.com/in/manikandan-kumaresan> | <https://github.com/BuildWith-ManikandanKumaresan>

PROFESSIONAL SUMMARY

Advanced back-end engineer with 11 years of experience architecting and delivering enterprise-scale, mission-critical platforms for the global gaming industry. Deep expertise in C#/.NET, microservices, Docker, Kubernetes, CQRS, and event-driven architecture, with a proven record of reducing deployment times and boosting API performance. Skilled at owning systems end-to-end - from architecture and API design to CI/CD, real-time integrations, and production hardening - while mentoring engineers and driving alignment across onshore and offshore teams. Certified in Generative AI and AI-assisted development. Known for rapid learning, mentoring colleagues, and translating business requirements into effective technical solutions.

CORE COMPETENCIES

Architecture: System Design, Microservices, Event-Driven Architecture, CQRS, Layered Architecture, Design Patterns, SOLID Principles, Domain-Driven Design, Distributed Systems

Engineering: REST API Design, Asynchronous Programming, Real-Time Communication, Performance Optimization, Code Refactoring

Delivery: Agile / Scrum, CI/CD, DevOps Practices, Code Reviews, Mentoring, Distributed Team Collaboration

Cloud & DevOps: Docker, Kubernetes, Containerization, Orchestration

AI: Generative AI, LLMs, Prompt Engineering, AI-Assisted Development

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET (Core, 6, 8), ASP.NET Core Web API, TypeScript, JavaScript, HTML5, CSS, PowerShell, T-SQL

Frontend: Angular 12 / 16, RxJS, Component Architecture

Databases: Microsoft SQL Server, Redis

Patterns & Libraries: CQRS (MediatR), Chain-of-Responsibility, Repository / DAO, Dependency Injection, Plugin Architecture, Entity Framework Core, ADO.Net

Messaging & Real-Time: RabbitMQ, ActiveMQ, SignalR

Testing: Unit Testing (NUnit, Moq), Performance Testing (JMeter)

DevOps & Tooling: Jenkins, CI/CD Pipelines, Git, Perforce, JIRA, Visual Studio

PROFESSIONAL EXPERIENCE

Light & Wonder Inc. - Chennai, India

Advanced Back-End Software Engineer | Dec 2019 - Present

Products: Tableview, Tableview Legacy, MCC Boss Gateway, Power Progressive Multisite (PPM), iView Content Engine (ICE), Systems Deployment Platform (SDP)

- Designed and built the iView Content Engine (ICE), automating enterprise configuration deployments across US, Europe, and APAC, reducing cycle time by 70% (5-7 days to 2-3 hours).
- Enabled self-service configuration management for non-technical users with built-in governance (approval workflows, compliance tracking) and seamless integration with Perforce and JIRA, improving adoption and reducing engineering dependency.

- Designed and built the Systems Deployment Platform (SDP), a generic, reusable, centralized desktop solution enabling business-driven configuration via dynamic questionnaires and eliminating external infrastructure dependencies.
- Led the migration of PPM 16.0 from legacy .NET Framework to .NET 6.0, paying down years of technical debt and unblocking future feature work.
- Optimized Web API and microservice hot paths, delivering 25-30% faster response times for 24/7 casino operations and reducing infrastructure cost.
- Expanded Tableview product into European markets (France) through MCC platform integration, opening a new revenue stream and broader customer base.
- Launched Floor View - a customer-driven real-time pit and table management feature - improving operational visibility for casino floor managers.
- Established an automated testing framework using NUnit, Moq, and Selenium that achieved 80%+ coverage and cut regression QA effort significantly.
- Implemented a cashless payment system for Tableview Legacy, enhancing user experience and reducing transaction friction.
- Mentored junior engineers and codified architectural patterns and coding standards that raised team productivity and code consistency.

Syncfusion Software Pvt. Ltd. - Chennai, India

Software Engineer Level 3 | Sep 2015 - Nov 2019

Products: *Big Data Cluster Manager, ODBC SDK Driver, ODBC SQL Engine, BOLD-BI Dashboard Designer*

- Architected and launched the ODBC SDK Driver from concept to release, enabling real-time data integration with Excel, Power BI, Tableau, Qlik, and BOLD-BI.
- Designed the ODBC SQL Engine, a query-execution framework that translated standard SQL into queries against NoSQL sources (MongoDB, Google BigQuery, Elasticsearch, OData, etc.) - bridging a long-standing gap for enterprise BI users.
- Added enterprise authentication (OAuth 2.0, Kerberos) to the ODBC ecosystem to meet customer compliance and security requirements.
- Led analysis and architectural design for 5+ major product enhancements, turning customer needs into clear technical specifications.
- Led proof-of-concept initiatives and architectural design reviews, translating complex customer requirements into scalable product specifications and actionable technical guidelines.
- Owned root-cause analysis for critical production issues, improving reliability and reducing support escalations.
- Ran code reviews and technical mentoring, establishing the coding standards adopted across the engineering team.

EDUCATION

M.Sc., Information Technology - Bharathiar University (Dr. N.G.P. Arts & Science College), Coimbatore | 2013 - 2015

B.Sc., Information Technology - Bharathiar University (Parks College of Arts & Science), Tiruppur | 2010 - 2013

CERTIFICATIONS

- Claude Code in Action - Anthropic (2026)
- Claude 101, Certificate of Completion - Anthropic (2026)
- .NET Core Microservices: The Complete Guide (.NET 8 MVC) - Udemy (2025)
